If you simply hate torturing your pets with those bulky and ugly GPS collars, check out the Nanofinder PetFinder collar. Unlike the other bulky collars, this one is small and stylish and yet does the job of tracking your dogs whereabouts, really well. Just download the Nanonavi software to your mobile device and you'll be able to track that runaway dog instantly via SMS/GPS/GPRS. The software is similar to Nanonavi's Friendfinder (\$249) that helps you locate your friends. The stylish collar also doubles up as a GEO-fencing control collar. A great way to make sure your dog is safe and secure; this collar is simply the best.
