Most GPS collars for pets are hideous. They are usually black and bulky and do the job, but you know Fifi would rather have something more fashionable. The Nanofinder PetFinder is a small and stylish pet collar which is also a GPS/GSM watch style tracker. Working in conjunction with Nanonavi software, you'll be able to locate your pet instantly via SMS/GPS/GPRS. Just download the Nanonavi software to your mobile device and you'll be able to track that runaway dog instantly. It also works as a GEO-fencing control collar if you have a dog like Marley...
